PakCanoe 170 - \$3275.00 CDN

PakCanoe 170

The wilderness workhorse. It will carry enough gear for a full-scale expedition on a wilderness river and is the best alternative in shallow water situations. Over the years, the 170 has become the preferred expedition canoe where logistics are challenging.

Model	Beam	Depth	Weight	Length	Capacity
PakCanoe 170	38"/96 cm	14"/36 cm	56 lbs/25.5 kg	17'/520 cm	910 lbs/415 kg

Important Features for Expeditions

Reinforcements. Expedition craft must stand up to hard wear and tear, and we reinforce the abrasion areas. There are five heavy "keel strips" under the bottom and thinner reinforcement strips to cover the gunwales. Further wear protection is provided by a closed cell foam pad covering the bottom between skin and frame to keep the skin from direct contact with the frame (this is incredibly effective).

Cross ribs are connected to the gunwales by lockable clips to make a solid connection even when you grab the gunwale to lift the canoe.

PakCanoe sides are protected by inflatable tubes on the inside pushing the fabric away from the aluminum frame and forming a built-in fender. Inflatable tubes may be inflated manually or with small supplied air pump.

D-rings are factory installed at both ends, half way up the stem, providing a low attachment point for ropes.

Important for Family Use

Inflatable tubes in the sides place flotation where it needs to be for improved stability and safety. The PakCanoe is easier to assemble because the inflatable tubes provide skin tension after the canoe has been assembled.

Aluminum parts are anodized to provide superior corrosion resistance even when a PakCanoe is used in salt water – and you will not get black hands by handling

Seaworthy Craft

Because of their skin-on-frame construction, PakCanoes flex and work with the waves in a way that hardshell canoes can't. The bow will rise and climb over waves instead of crashing into them and taking on water. This lets PakCanoes run much drier than traditional canoes in storms and whitewater.

Base PakCanoe 170 \$3275.00 CDN; *includes a carrying duffel, emergency repair kit, and air pump (pump not required)*

Optional Spray Skirt \$525.00 CDN

Optional Carrying Yoke \$100.00 CDN

Packaged for "expedition" PakCanoe, with spray skirt and carrying yoke - \$3,800.00 CDN

Hulls are only available in red or green, spray skirt decks come in yellow.
