Quest 150 Touring Kayak - \$2040.00 CDN

Quest 150 Touring Kayak.

The Quest 150 is a compact skin-on-frame touring kayak. It is long enough for effortless cruising, and roomy enough to hold your over-night camping gear, yet it is small enough to fit moderate size paddlers. The 150 is in its element when your travels cover many miles and hours of paddling. At the end of a long day you will send some grateful thoughts to the Quest's outstanding seat.

Model	Length	Beam	Depth (max)	Weight
Quest 150	14 ft 11 in, 455 cm	24 in, 61 cm	13 in, 33 cm	31 lbs, 14.1 kg
Quest 150 as SOT	14 ft 11 in, 455 cm	24 in, 61 cm	10.5 in, 27 cm	26 lbs, 11.8 kg

Quest 150 Touring Kayak (2nd Generation).

The Quest is a skin-on-frame touring kayak. All hull materials are coated or laminated with polyurethane for a combination of durability and extremely light weight (less than half the weight of a plastic kayak). Inflatable kayaks of similar size weigh 50% more than the Quest, and they do not compare because the Quest's performance and sleek lines cannot be achieved with an inflatable structure. Its polyurethane coated materials contain no toxic chemicals, and the design combines great looks with comfort and efficient cruising performance. Capacity of the Quest 150 Touring Kayak is 290 lbs (130kg).

Unique Design.

The new Quest represents another advance in Pakboats' hybrid folding/inflatable construction: Enhanced frame technology produces a stiff and light hull structure that makes assembly a breeze in combination with multiple flotation cells that tension the skin and provide buoyancy.

To combine hull stiffness and simplicity in a very lightweight design, Pakboats developed a method to tension both keel and gunwales without adding weight and cost. 2nd generation Quests get added stiffness in the mid-section where it is most needed, without adding weight in the ends. The deck is installed after the hull is completely assembled, and the deck seal is secured by end caps and "wrapovers" that are welded to the boat skin, sealing out splashing waves. The "wrapovers" also support deck rigging.

Excellent Seats.

Comfort starts with the seat, and the Quest seat is "best in class". The fabric sling is supported front to back, completely eliminating pressure points, and an inflatable thigh support adjusts to fit any paddler. Back band and seat surface are covered with three dimensional mesh for maximum air circulation. The seat drops into brackets on the cross ribs, so installing the seat during assembly takes almost no time.

Easy Loading.

Quest decks can be opened at both ends for exceptionally easy access and loading of gear. The simplicity and light weight let the Quest fit into a single compact storage bag for travel, and it can easily go with you as airline baggage.

Unique SOT function.

Unlike other touring kayaks, the Quest 150 can be paddled without a deck, like a sit-on-top. Simply leave the deck off in calm conditions. The 150 has a lot of flotation built in to keep you safe. Even better, the flotation is placed in the sides where it helps keep the kayak stable, even when it is swamped. Very few kayaks have this safety feature. Typical flotation centered in the ends does not contribute to stability. *Please note: The Quest 150 includes a deck, but the deck is not always needed.*

Base Quest 150 Touring Kayak \$2040.00 CDN; Optional Rudder System \$390.00 CDN

Hulls are only available in black, Spray skirt decks come in blue or yellow

Some Additional Quest 150 Photos

Front Edge of seat looking forward into interior of hull; and full yellow spray skirt (deck).

Everything packed and ready to go in one simple bag (31 lbs – 28”x16”x12”); optional rudder

Skirt Installed over spray deck.

You May also consider the Quest 150’s larger cousin, the XT-17

Pakboats XT – A super stiff structure supports long hulls and heavy loads. XT kayaks are fast and over-all paddling performance is exceptional. XT kayaks share the Quest’s ample multi-chamber side flotation and the hulls are free of thwarts so space is unobstructed. The moderate depth of XT hulls minimizes wind effects and gets the gunwales out of the way of your hands for comfortable.

Model	Beam	Depth	Weight	Length	Capacity	Packed Bag Size
XT-17 (Solo or Double)	24 in/ 61 cm	10 in/ 25 cm	44 lbs/ 20 kg	17 ft/ 520 cm	400 lbs/ 182 kg	33 in x 21 in x 14 in

2019 Quest 150 & XT-17 Pricing:

Base Quest 150 Touring Kayak \$2040.00 CDN;
Optional Quest 150 Rudder System \$390.00 CDN
Hulls are only available in black, Spray skirt decks come in blue or yellow

Base XT-17 Touring Kayak with SOLO Deck \$2575.00 CDN;
Base XT-17 Touring Kayak with SOLO&DUAL Decks (2 decks included) \$2850.00 CDN;
